Detailed Action

EXAMINER'S AMENDMENT

Status of claims. Claims 2-11 and 13-16 are pending. Claims 3-11 were previously withdrawn from consideration as being directed to non-elected invention pursuant to 37 CFR 1.14(b), there being no allowable generic or linking claim.

The Examiner contacted Applicant's representative on March 2, 2010 to discuss the merits of Applicants' amended claims filed on 12-02-2009. The Examiner proposed an amendment to the pending claims to set them forth in condition for allowance.

Authorization for the Examiner's amendment was given in a telephone interview with Mitchell Bernstein, on March 04 and March 05 2010. With respect to the proposed claims, an Examiner's amendment to the records appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it must be submitted no later than the payment of the issue fee.

In the claims,

1) Claims 3-11 have been cancelled.

2) Claims 2, 13 and 16 been rewritten as follows:

1. A method of producing antibodies, comprising contacting chicken-derived B cells in which gene conversion is occurring at an immunoglobulin locus with an amount of a histone deacetylase inhibitor effective for relaxing the chromatin structure of chromosomes in said chicken-derived B cells and enhancing gene conversion, thereby obtaining said antibodies.

13. Correct claim 13 as follows: Page 3, line 1 of claim 13, the phrase "Claim 3" is replaced by -- Claim 2--;

Art Unit: 1633

16. A method for producing an antibody that binds a target antigen, comprising:

- i) contacting chicken-derived B cells in which gene conversion is occurring at an immunoglobulin locus with an amount of a histone deacetylase inhibitor effective for relaxing the chromatin structure of chromosomes in said chicken-derived B cells and enhancing gene conversion, whereby diverse antibody-producing chicken-derived B cells are obtained;
- ii) contacting said antibody-producing chicken-derived B cells with said target antigen;
- iii) selecting an antibody-producing chicken-derived B cell producing an antibody that binds said target antigen; and
- iv) culturing said selected antibody-producing chicken-derived B cell to produce said antibody that can bind said target antigen.

Reasons for allowance

The following is an examiner's statement of reasons for allowance: The prior art of record does not teach or suggest of a method of producing antibodies, comprising contacting chicken-derived B cells in which gene conversion is occurring at an immunoglobulin locus with an amount of a histone deacetylase inhibitor effective for relaxing the chromatin structure of chromosomes in said chicken-derived B cells and enhancing gene conversion, thereby obtaining said antibodies.
